PROFESSIONAL SUMMARY

Experienced .NET Full-Stack Developer with 2.5 years of hands-on experience in designing, developing, and maintaining enterprise-grade web and desktop applications across Travel and Logistics B2B domains at Infosys. Skilled in C#, ASP.NET Core Web API, SQL Server, Entity Framework Core, Angular 16+, and Azure deployments, with expertise in building RESTful APIs, implementing JWT authentication, and modernizing legacy systems while improving application performance by up to 30%. Adept at working in Agile environments with 15-day sprint cycles tracked in Jira, leveraging CI/CD pipelines, Confluence for project documentation, and Octopus Deploy for release and deployment activities across multiple environments.

SKILLS

Programming Languages : C# , HTML5 , CSS3 , javaScripts , TypeScripts , Java.

Frameworks : .Net, ASP.NET Core Web API ,Entity Framework Core, Angular, Bootstrap.

Web Technologies & Patterns: RESTful APIs, JWT Auth, OOP, Repository Pattern, DI, SOLID Principles.

Databases: MSSQL Server.

Could Platforms : Microsoft Azure, CI/CD.

Tools: Visual Studio, VS Code, Git , SonarQube, Github Copilot, Postman, SSMS , Octopus , Jira, Confluence.

WORK EXPERIENCE

Infosys Pvt. Ltd. Dot Net Developer (SE)

Nov 2022 - March 2025

Project: AMD | Work Order System

Pune, Maharashtra.

- Implemented multiple end-to-end features for a US-based B2B "Work Order System" app using ASP.NET Core Web API, C#, and Angular, improving efficiency by 20% via Entity Framework Core and SQL Server.
- Architected and implemented RESTful APIs and JWT authentication, enhanced API performance while ensuring a seamless, responsive UI with HTML5/CSS3 for enterprise-scale logistic application
- Contributed to enhancing and maintaining multi-layered .NET Core Web APIs using Controller-Service-Repository patterns, improving reusability and maintainability by 35% through SOLID and DRY principles.
- Improved application quality through unit testing with NUnit, achieving 85% test coverage, reducing code duplication, and lowering deployment failures by 15% using SonarQube.
- Collaborated with cross-functional teams, following structured branching strategies such as Main, Projects, Releases, and Integration, ensuring stable builds, smooth code integration, and clean release management.
- Followed 15-day sprint cycles in Jira, where clients assigned user stories and features to be planned, developed, and delivered within the defined sprint timeline.
- Participated in complete SDLC activities across Dev, QA, UAT, and Production environments, supporting deployment validation, defect fixes, and smooth production releases.
- Leveraged GenAI tools such as GitHub Copilot and GPT-4.1 to resolve complex code issues, optimize implementations, and generate unit tests, improving development efficiency and overall code quality.

PROJECTS

CodePulse – Full-Stack Blogging Platform 

Sep 2025 - Dec 2025

- Developed full-stack blogging application using ASP.NET Core Web API and Angular implementing the Repository Pattern and Dependency Injection to achieve a decoupled, maintainable architecture.
- Secured the platform by integrating JWT Authentication and Angular Auth Guards, reducing unauthorized access risks and ensuring 100% secure user sessions.
- Engineered a responsive UI featuring Live Markdown/Image preview, Image Upload with static file serving and Filtering/Sorting/Pagination to enhance user engagement.
- Integrated SQL Server and managed database schemas using EF Core migrations while utilizing Swagger and Postman for API documentation and reliability.

CERTIFICATIONS

Angular & ASP.NET Core Web API | by Udemy 

Microsoft Azure AI Fundamentals (AI-900) | by Microsoft 

EDUCATION

Bachelor of Engineering | Mechanical

JSPM Narhe Technical Campus, Savitribai Phule Pune University, Pune, Maharashtra.

2018 - 2022

GPA: 8.84/10
